FOR ALL LOCAL DENTISTS & DENTAL HYGIENISTS

ORAL PATHOLOGY: A RATIONALE FOR DIAGNOSIS & TREATMENT

Presented by Meyer Clinic's Dr. Patrick Friend

One of the most important parts of our jobs as dental professionals is to look for potentially dangerous conditions in the mouth. Looking for oral pathology is challenging as there are a wide range of normal appearances of tissues in the oral cavity. Being able to differentiate normal from possibly abnormal conditions is very important. This lecture will be an extensive review on oral and maxillofacial pathology which will emphasize diagnosis and treatment of common pathology seen in the dental office.

Dr. Patrick Friend was born in Fort Knox, KY and shortly after moved to Fresno, CA. While attending University of Southern California for dental school, he became

interested in Oral and Maxillofacial Surgery and was honored by the California Association of Oral and Maxillofacial Surgeons for his efforts. Following dental school, Dr. Friend completed a one-year Oral Surgery internship at University of Texas Southwestern in Dallas, TX. He then moved to Miami, FL to complete his Oral and Maxillofacial surgical training under the guidance of Robert Marx, DDS. Dr. Friend joined the Meyer Clinic in 2016.

Thursday, April 27th, 2017

5:30-8:00PM

Fauquier Free Clinic
2nd Floor Conference Room
35 Rock Pointe Lane,
Warrenton, VA 20186
